### THE ASCENT OF SAN ANTONIO.

By WILLOUGHBY RODMAN.

The highest mountains of Southern California are Grayback (also known as San Bernardino) and San Gorgonio. These two peaks rise from a common base, and, with that uncertainty which characterizes the nomenclature of this section, the three names given are applied to them indiscriminately.

The higher of these peaks attains an altitude of more than 12,000 feet, and is said to rise higher above the level land immediately surrounding it than any mountain in the world.

To the southeast rises Mt. San Jacinto, an extinct volcano, whose rumblings even to-day cause the Indians to speak of it as the abode of evil spirits. This mountain is said to have the highest vertical rock wall of any mountain in the world.\*

But the best-known mountain, the real king of the Sierra Madre Range, is San Antonio, erroneously (and lovingly) called "Old Baldy."

Situated near the center of the complicated system of canons and ranges comprising the Sierra Madre Range, towering far above its neighbors, "Old Baldy" is the dominant feature of the landscape. It is the first prominent mountain to greet the traveler from the north or

# Willoughby Rodman Article Ascent of Mt. San Antonio in 1903

### First Chapter Chair

The writer had the pleasure of making the trip in November, 1903, spending two most enjoyable days en route. The party was composed of six members of the Sierra Club,—Messrs. Force Parker, Clair Tappan, R. B. Dickinson, Ross T. Hickcox, Thornton Kinney, and the writer,—all of whom, except Mr. Tappan, took part in the Kern River outing. Taking the Santa Fe train leaving Los Angeles at 7:30 on the morning of November 7th, we arrived at Uplands, where we left the railway, at four minutes after 9.

But I must mention one circumstance. By that campfire in a windy cañon of the Sierra Madre the Southern California Section of the Sierra Club was born. An organization was completed and work planned. The object of the section is to forward the work of the Sierra Club in Southern California. It is strictly subordinate to the parent club (Sierra Madre?). It will take no action not sanctioned by the directors, and will always work in the name of the club, and for the purpose of extending its influence and furthering its objects.

I shall not at this time trouble the readers of the EULLETIN with an account of the work performed by the section since its organization, but state that we hope in the future to accomplish even more.

# In the Spirit of the Rodman Article the earliest years were devoted to climbing Mt. San Antonio

#### NOTES AND CORRESPONDENCE

#### NEWS ITEMS FROM THE SOUTHERN SECTION

By C. J. Fox

Membership in the Southern Section has been growing steadily. Schedule trips have been well attended. There was an average of fifty-six persons on each of the fifteen regular trips during the fall. The Hallowe'en trip to Wheeler's Hot Springs appealed to 175 persons, and Collins Ranch brought out 104 persons, the majority in each case driving out in their own machines. The first trip of the fall was a four-day automobile tour to Bakersfield, Greenhorn Mountains, Sunday Peak, Mohave Desert, and Red Rock Cañon.

The regular Wednesday luncheons, newly scheduled at the Broadway Café, have exceeded the expectations of the committee. Many times there are thirty to fifty present, and a closer fraternity among members is thus accomplished.

During the year the club has offered three stereopticon lectures to members and to the public without charge. Mr. Hazzard, a Mount Ranier guide, spoke on "The Peaks of the Northwest." Mr. Francis M. Fultz spoke on "Southern California Trails and Flowers." Mr. Wylie showed the attractions of Yellowstone National Park and Bryce Cañon, and Mrs. Hinshaw, F. R. G. S., presented the "Mountainous Interior of Vancouver Island." The usual attendance is about two hundred persons.

The Southern Section was greatly favored during the New Year's holiday by a three-day visit from club members from San Francisco and the bay region, including William E. Colby and Joseph N. Le Conte. W. J. Aschenbrenner assisted in arranging the excursion. Another guest was Colonel John R. White, Superintendent of Sequoia and General Grant national parks. Some of the features of entertainment carried out by Chairman Phil S. Bernays and his reception committees were luncheon at Beverly Hills Hotel, inspection of the Douglas Fairbanks studios, dinner at the Ebell Clubhouse (attended by nearly two hundred persons), followed by a revue entitled "High Sierra High," written and staged by the Misses Mortimer and given by a cast of southern California members, presenting the delights and the hardships of traversing the high regions. A trip to Mount Lowe and the climb of San Gabriel Peak, and on New Year's day a view of the Pasadena Tournament of Roses, completed the round of events. We trust the visitors will come again and bring other members.

## 1923 Sierra Club Bulletin

# Fun to Read, and eventually it deals with Old Baldy

to a committee to install a permanent covered cement box for one of them. The work is now finished. As the ascent of Mount San Antonio (10,500 ft.) has proved strenuous for a day's trip, especially in winter, the Trails Committee has been successful in procuring a log cabin about half-way to the summit. This will be improved and fitted up for overnight stays. This peak is snow-covered about five months during the winter, and as the base of it at Camp Baldy is but three hour's ride from Los Angeles, a magnificent snow region will be more accessible. The amount of one hundred dollars to buy the cabin was donated by a good member. (Guess who?)

The Southern Section made an initial entry of a float in the Pasadena Tournament of Roses. Over a genuine fire a real hiker had tarried to flap some real flapjacks. A twisted wind-blown pine was overhead and dunnage-bags were strewn about. Several members carrying pack outfits followed a zigzag trail behind.

The key to Muir Lodge is kept at Fern Lodge (public camp), but a tenminute walk below our lodge. Any member may get the key without notice or charge by signing the register. The lodge and premises are kept in attractive condition by the week-end parties and by the House Committee. Although Muir Lodge has not often drawn upon the club funds for building or maintenance, yet it is club property. Some seven hundred dollars has lately been spent for more locker space, etc., and a small amount was borrowed from our treasury. At the ninth anniversary of the lodge, last November, a party of sixty-five strolled up the six-mile trail and spent the evening about the big fireplace, roasting chestnuts and enjoying an impromptu program. More than one hundred members now have lockers there. We hold three government sites, which provide ample open spaces and prevent erection of other cabins at close range.

### MT. SAN ANTONIO (OLD BALDY) Elevation, 10,080 feet

No. 1.—B. Sept. 2-3-4.—Note that this is the same date as the Greenhorn Mountain trip.

Several members of the club have looked forward to the time when we would have a shelter or cabin to use as a "half-way" stop over on the Old Baldy trail.

There is a cabin on an abandoned mining claim on the Devil's Backbone trail near the

San Antonio-Lytle Creek divide and an application for a lease in the name of the Sierra Club has been filed with the Forest Service with the intention of using the cabin as a public shelter and storage room.

This trip is to be a "tryout" to determine how useful the cabin can be made.

Saturday, Sept. 2, 1922. Arrive at Camp Baldy about 5:30 p. m., via private autos or Pacific Electric, 3:25 p. m., San Bernardino train to Upland and Camp Baldy stage.

After dinner at Camp Baldy or carried with you, go up Mt. San Antonio Devil's Backbone trail five miles to cabin.

Sunday. Seven mile round trip to the summit of Mt. San Antonio, and repair work on cabin.

Monday, (Labor Day). Five mile direct return to Camp Baldy or one of several side trips may be taken.

Sleeping blanket made of any old material that no one would think worth carrying away would be sufficient and could be left for use on future trips.

Commissary for four or five meals but as simple as possible to avoid extra load up from Camp Baldy. This is an alternative Labor Day trip and is especially scheduled for those unable to make the four day trip mentioned above.

Leader. H. G. McMannus, 827 So. Gramercy Place, Los Angeles. Telephone, evenings, 567-561, but reserve before Thursday by mail if possible.

#### MT. SAN ANTONIO CABIN

No. 8. June 23-24, 1923.

An appropriation has been made to cover cost of materials required to repair and remodel the cabin, but it is hoped that several of our members will enjoy mixing a little work on the cabin with the other pleasures of an outing in that locality, and in that way reduce the labor cost of the job.

Saturday, P. M.—Go to Camp Baldy Ranger Station auto park, then hike on up San Antonio Canyon about five miles to the cabin.

The present plan is to hire a few pack animals to carry tools, material and dunnage from Camp Baldy to the cabin.

An attempt will be made to straighten the walls, overhaul the stoves, etc., so that actual work on the bunks can be started on the next trip.

Remember that donations of old carpet, gunny sacks or similar material are now in order and if taken up on this trip it will not be necessary to pack in sleeping bags on other trips.

Mt. San Antonio Cabin Committee:

MISS WILLARD, Telephone 26556.

MISS HARWOOD, Upland.

M. E. PETERSON, Hollywood, 4960.

E. W. COOK, Chairman, Telephone 351-494.

### San Antonio Cabin Committee

Sched. No. 32 (Summer 1923): Edgar W. Cook, Chair. Miss Willard, Miss Harwood, M.E. Peterson

Sched. No. 35 (12/29/23 to 2/17/24): Edgar W. Cook, Chair; Elsie Nutting, Aurelia S. Harwood, D. Duncan Chalmers

Sched. No. 41 (12/24/24 to 3/18/25): Kasper Casperson, Chair. D. Duncan Chalmers, Aurelia S. Harwood, Harold A. Lepper.

Sched. No. 46 (2/11/26 to 4/25/26). Same as No. 41, except Otis Jones replaced Harold A. Lepper.

Sched. No. 47 (4/30/26 to 7/5/26). Kasper Casperson, Chair. D. Duncan Chalmers, Aurelia S. Harwood, Otis Jones, David Kennedy.

Sched. No. 51 (3/26/27 to 7/4/27): Kasper Casperson, Chair. D. Duncan Chalmers, Aurelia S. Harwood, Morris Boyd, Harry Gunn.

Sched. No. 54 (12/24/27 to 4/2/28): Lists only Elwin W. Horne, Chairman.

Sched. No. 55 (3/31/28 to 7/1/28): Elwin W. Horne, Chair; Robert W. Penman, Majorie (sic) H. Bowen; Lynette Legge, Rodna Miess.

Sched. No. 57 (10/1/28 to 1/1/29): No change.

Sched. No. 59 (4/2/29 to 6/30/29): Robert W. Penman, Chair; Marjorie H. Bowen, Harry R. Gunn, Leota E. Troute, Peter Van Oosting.

Sched. No. 62 (1/3/30 to 4/8/30): Robert W. Penman, Chair; Marjorie H. Bowen, Harry R. Gunn, Leota E. Troute, Charles Neis.

Sched. No. 65 (10/10/30 to 1/16/31): Same as No. 62, but name of committee changed to Harwood Lodge Committee.

The "founder" of Southern California backcountry skiing was Dr. Walter Mosauer, an Austrian transplant and professor of zoology at UCLA. The doc was a remarkable skier for the time, and began teaching his techniques to a number of young students in 1931. The gaggle of skiers made numerous ski descents to the local mountains, Old Baldy (Mt. San Antonio), San Gorgonio and San Jacinto. On February 14, 1932 Dr. Mosauer made a ski descent of Old Baldy and was so impressed with the natural bowl and quality snow conditions that he suggested the erection of a "ski hutte" in Baldy Bowl.

Coached UCLA Ski Team

1934 – With UCLA Ski Team, organized the Ski Mountaineers of California (no Sierra Club affiliation)

Spring of 1935 – Group decides to build a ski hut in Baldy Bowl. Permit denied by Forest Service because group was too small.

Club President Ernest Dawson invites group to join Sierra Club en masse, which they do, becoming Ski Mountaineers Section (SMS).

Permit granted and construction started in 1935.

### **Walter Mosaur**

### **George Bauwens**

The force behind construction of the ski hut.

Pioneer ski mountaineer from the Tyrol.

"Get to work, you lacey lofers!"

Over 10 tons of building materials hauled up by Ski Mountaineers and other Chapter members.

L to R: Nelson Nies, Mary Jane Edwards, Dick Jones

**Construction during 1935** 

Completed in Jan. 1936

Completed in Jan. 1936

**Burned to Ashes in Sept. 1936** 

"It was truly a great loss and meant doing the task all over again. But this task was undertaken with great enthusiasm almost immediately by an increased number of members, and by the time good skiing arrived in Dec., a new and larger ski hut was completed and ready for use on the site of the earlier hut." – Mugelnoos, 1937
